## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments filed 07/23/2007 have been fully considered but they are not persuasive. Applicant argues that the automated vending machine of Banerjee does not comprise two modes let alone the two modes claimed. However more than two modes of use are claimed and appear in the figures of Banerjee including a temporary locker, a delivery device for transactions preformed prior to delivery and stocking/filling the machine with items with sales prices for on the spot sale. For at least the foregoing reasons claims 21-26 stand rejected.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Art Unit: 3651

Claims 21- 27 are rejected under 35 U.S.C. 102(e) as being anticipated by Banerjee et al. USPN 6,748,296.

"stocking the at least one storage compartment operated in the first operating mode" (claim 20). "recording offer identification codes associated with the goods in the central processing unit ... storing data ... converting this data into control commands for controlling the electronic storage ... change the operating parameters of the of the electronic storage compartment system" (abstract, claim 1).

(Re claim 22) "transmitting the stocking of the goods into the electronic storage compartment system to the central data processing unit" (413 figure 4).

(Re claim 23) "stocking of the compartments with goods by means of a graphic display unit" (claim 12).

(Re claim 24) "receiving goods in individual compartments for a certain period of time" (col 8 line 25-43).
